Notes Map Info The "Wizard of the West" (France) led the Allied invasions of the First World War. This description was printed on the map and description of the game Why is a first-person shooter the faction weapon, We weren't allowed to choose a faction weapon, but I selected first person shooter as I wanted the highest kill potential at the front line. How can a battle be sieged, I used the 'Patch 1.6.6 Sieges' mod, which adds siege weapons and combat units to the game, and also means you can get closer to the front line. The lower population numbers are intended to give a small advantage to your side, and also to reduce the chances of the attacker being able to mount a counterattack A: The outcome of the battle was decided by two factors: The defenders sieging were outnumbered 2.3 to 1 (it's not possible to tell who won from what is written). The defenders had the infantry and artillery advantage (the attackers had only foot soldiers and artillery) The defenders could have used their artillery and infantry to break the attackers siege. Q: How can I hide div when checkbox is not checked? I would like to hide a div when checkbox is not checked. Here is my code: function showhide(){ if(document.getElementById("checkbox").checked == true){ document.getElementById("div").style.visibility="visible"; } 82157476af
